1. Location: The "October Revolution" Locomotive Plant is located on the eastern outskirts of Voroshilovgrad (39°19'E/48°04'N), Ukrainian SSR.
2. Plant installations: The plant area is about 1.8 miles wide and several miles long. Production at this plant started in 1946. Up to that date only reconstruction work was being done. Since then, up to the end of the period of observation, production has increased steadily as construction work has progressed. The plant had its own power station and widely dispersed railroad connections. For plant layout see Annex.
3. Work force: 8,000 to 10,000 Soviets and 3,000 PWs.
4. Production: Locomotives.

Comment:

This, the largest locomotive plant in the Soviet Union was previously reported. Previously reported details are confirmed. Some minor differences relating to the location and designation of individual plant buildings were clarified. This previous report was compiled from information from twenty different sources. Subject report furnishes no information on the type of construction and the dimensions of the plant buildings. This information was also missing in the report mentioned. A previous report contained such data which, however, needs confirmation.
